

PRESS RELEASE

Ref: IJ2123

April 2010

Industrial Inkjet Ltd will introduce their new Digital print system at IPEX2010

World-wide Konica Minolta IJ support partner Industrial Inkjet Ltd will be showing a complete reel-to-reel professional digital colour print system with a print width of 282mm and a speed of 27metres/minute. The complete system is available for a price of around UK£200,000 including print engine, software, reel-to-reel system and UV lamp. Printing width on the reel-to-reel system can be varied up to 410 mm.

Industrial Inkjet Ltd adds that the technology minimises ink use and their flexible attitude to ink supply ensures their customers pay the absolute minimum cost-per-print. The system uses Konica Minolta inkjet printheads which give exceptional reliability and negligible down-time.

“IPEX is the most important event this year for us, and we decided it was important for us to show a ‘production-ready’ reel-to-reel system” said John Corral, Managing Director of Industrial Inkjet Ltd. “We believe our printing system is the most cost effective product in the market. We are very keen that our potential customers come and see the print quality we achieve and also see for themselves how reliable and easy to use it is.” The system will be demonstrated on the Konica Minolta stand.

Industrial Inkjet Ltd will be demonstrating variable colour image printing onto both plastic film and coated paper label stocks. The print engine used in this system is easily adapted to a wide variety of print applications such as direct product decoration. IJ manufactures print engines from 36mm width upwards and with speeds up to 120metres/minute.

Visit IJ on the Konica Minolta stand at IPEX, Hall 9, stand D340.
