August 2010

INDUSTRIAL INKJET LTD unveils its new, high speed, high quality full-colour digital print unit at LabelExpo Americas 2010

At LabelExpo Americas 2010 in Chicago, USA, Industrial Inkjet Ltd will unveil the latest model in their exciting range of ColourPrint inkjet print engines. Producing higher print quality at higher production rates, this new model is designed to meet the exacting requirements of the label printing industry.

Based on proven technologies including Konica Minolta inkjet printheads, the ColourPrint 142 HQ comes with the reliability and ease of use demonstrated by earlier products in the range.

“Our new print engine, with 720x720 dpi resolution print, is fast and has the highest quality in the market. I believe that it will open up new opportunities and will start the next phase in the development of the digital label market.” - said John Corral, Managing Director of Industrial Inkjet Ltd. – “While a proportion of customers have been happy with the quality from our 360 dpi models, some clients in the label sector are looking to match the print quality and production speeds of flexo. This new ColourPrint system takes us a step closer to meeting those requirements and I believe it will set a new print quality standard for inkjet digital printing”.

Come and see double the speed and double the quality from Industrial Inkjet at LabelExpo Americas 2010, in Chicago from 14 to 16 September 2010. We are located on the Konica-Minolta stand, number #5924.
