

Items for Recycling when Buying New Industrial Inkjet Products

Under the Austrian Ordinance on Waste Prevention, Collection and Treatment of Waste Electrical and Electronic Equipment (WEEE Ordinance), the producer of certain types of electrical and electronic equipment is required to finance the collection, treatment, recycling and recovery of any new electrical and electronic equipment that you buy from them after August 13th 2005, when that new equipment eventually becomes waste. Industrial Inkjet supplies inkjet printer heads and control system electronics which are designed to be integrated into an inkjet printer. Inkjet printer heads and control system electronics are components and as such are not covered by any of the requirements of the WEEE Ordinance. Although there is no legal requirement for Industrial Inkjet to arrange for the collection and recycling of its products once these become waste, Industrial Inkjet is an environmentally responsible company. Industrial Inkjet has therefore decided to establish a voluntary take-back and recycling service in Austria to ensure the environmentally sound treatment and disposal of its products. Industrial Inkjet has established a recycling contract with the European Advanced Recycling Network (EARN) and will cover any costs of recycling the equipment in this box on arrival at an EARN recycling company. Please complete this label and attach it to a suitable box for transport of old printer heads to EARN.

Please confirm that enclosed equipment is:

From (your company name and address):

An Industrial Inkjet product which has become waste

To be sent to:

**EARN Partner
